Intersections between the Europe 2020 indicators, by sex
MEN 2009 – 2010

ARPR: 9.3%
- ARPR & DEP: 2.3%
- DEP: 3.7%
- LW: 2.3%
- ARPR & LW: 2.5%

ARPR & DEP & LW: 1.4%

DEP & LW: 0.4%

ARPR: 9.2%
- ARPR & DEP: 2.2%
- DEP: 3.6%
- LW: 2.5%
- ARPR & LW: 2.7%

ARPR & DEP & LW: 1.6%

DEP & LW: 0.5%
ARPR stands for at-risk-of-poverty rate; DEP stands for severe material deprivation rate; LW stands for the share of people living in a household with zero or very low work intensity. Source: Eurostat, EU-SILC data.

The Gender Equality Index scores for EU-27
Part II: The Risk of Calculating
The issue of gender equality, dates back to the Greek antiquity. Aristophanes Lysistrata personifies this struggle quite eloquently.
The ancient Greek ‘Princesses’ with their different garments, represent women’s contribution to the economy and the society.
Women’s profiling nowadays shows the aspects of their struggle for emancipation.
The non-reported and non-recorded violence against women should receive the most urgent attention.
Thank you all for your attention
